**Amendments To The Claims:**

**Listing of Claims**

The following listing of claims replaces all previous listings or versions thereof:

1. (Currently Amended): A cirrhosis scid mouse model, characterized in that a human cirrhosis tissue is transplanted engrafted in a kidney of a scid mouse.
2. (canceled)
3. (canceled)
4. (canceled)
5. (canceled)
6. (Original): The cirrhosis scid mouse model as set forth in claim 1 whose natural-killer-cell-dependent immune response capability is defective.
7. (Original): The cirrhosis scid mouse model as set forth in claim 6, wherein the natural-killer-cell-dependent immune response capability is made defective by administering an anti-asialo GM 1 antibody.
8. (canceled)
9. (Original): The cirrhosis scid mouse model as set forth in claim 1, wherein the human cirrhosis tissue is classified as Child A in accordance with Child's classification which classifies cirrhosis in terms of severity.
10. (Currently Amended) A production method of a cirrhosis scid mouse model, characterized by said method comprising the steps of transplanting a human cirrhosis tissue in a kidney of a scid mouse whose immune response capability is made defective and engrafting the hepatic tissue.
11. (canceled)
